Distribution

Automation and Process Control from one hand with MEYLE engineering

Complete system solutions for the automation of machines and equipment in

- Factory automation
- Crane control
- Packaging machines
- Machine building
- Food production
- Beverage production
- Wind turbines / Wind parks
- Steel and mining industry
- Oil- and refinery industry
- Chemical- and pharmaceutical industry
- Materials handling
- Robot and automated guided vehicle systems

Long term experience and competence in planning, engineering, commissioning and initial start up of industrial operations and processes with an engineering team of certified engineers (Dipl. Ing.) from different fields who develop concepts and solutions using products from market leading manufacturers.

- Worldwide engineering service for system integration
- Manufacturing range of incremental-, absolute- and bus encoders, inductive-, capacitive- and programmable proximity sensors, optoelectric sensors and safety switches
- Distributer for market leading manufacturers, factory trained engineers
- Spare and maintenance parts management
- Consolidated shipments and fast delivery
- Large quantity purchase contracts with suppliers and call of orders
- 40 years market experience, ISO 9001:2000 certified since 1998
- More than 800 suppliers, next to standard distribution lines:

MEYLE level-, flow-, pH- and pressure sensors

- Float level switches, electro optic level switches
- Multi-point level switches, flow switches
- Flow, conductivity and pH sensors, transmitter and batch controller
- Pressure switches and transducers

MEYLE incremental, absolute and bus encoders

- Incremental rotary encoders up to 80.000 pulses and IP 68 protection
- Absolute rotary multi- and singleturn encoders up to 29 Bit with shaft or hollow shaft
- Bus interfaces for Profibus, CANopen, CANlift, Interbus, DeviceNet, SSI, BiSS and parallel output
- Linear scales and encoders

MEYLE programmable proximity sensors

- Software programmable, application learning
- Background metal rejection, band and position sensing
- Solves the unsolvable application

MEYLE safety switches and components

- Rope and push button operated emergency STOP switches
- Rotation speed monitors for braking and conveyor speed control
- Off track belt switches
